

Advanced Network Systems Attains New VMware® Infrastructure Solutions Credentials

CHARLOTTESVILLE, VA – June 25, 2010. Advanced Network Systems has achieved VMware's Infrastructure Virtualization Competency. The Infrastructure Competency recognizes partners for their specialized level of ability to virtualize and consolidate server environments using VMware solutions.

Solution competencies were developed by VMware to clearly differentiate their reselling partners' expertise to customers and maximize the benefits of the VMware Partner Network. According to VMware, "It provides committed partners with an additional level of customer credibility, based on their demonstrated knowledge and ability." We are pleased to have earned this special designation and look forward to helping many more customers achieve the full scope of business benefits that go along with a virtualized IT environment.
