

Welcome Kathy Woolf: Our New Northern Territory Account Executive

In late December, Kathy Woolf joined Advanced Network Systems as our Account Executive for the northern region. Kathy is a seasoned sales professional in the telecommunications industry, and comes to Advanced Network Systems with an extensive background in account management and business development. Prior to joining our sales team, she held a long-standing territory management position with a regional telephone system reseller, where she worked with clients to implement technology solutions.

Kathy will be working from a newly established sales office in the Shenandoah Valley, and will be highly accessible to all accounts in her territory. During her initial weeks, Kathy will be familiarizing herself with all of our existing accounts and prospects. She and the other members of our sales team will be working to ensure that we continue to reliably meet all customer requirements and expectations. Kathy can be reached by phone at 434-960-5678/800-639-6757 or by email at kwoolf@getadvanced.net.
